

Dr Ard Louis is a Royal Society University Research Fellow and Lecturer in Theoretical Physics at Oxford University, where he leads an interdisciplinary research group studying problems on the border between physics, chemistry, and biology. Before that, he taught in the Department of Chemistry at Cambridge University. He is the International Secretary for Christians in Science, an associate of the Faraday Institute for Science and Religion and on the European board of advisors for the John Templeton Foundation. Ard has a passion for working with postgraduate students and also for helping Christians think Biblically about the world around them. He was born in the Netherlands, but grew up in Gabon, Africa.

Thomas Seidler is a forgiven sinner and part of the Church of Christ! He began trading in chemicals whilst studying at Eton College, but failed to complete a degree in Maths at Warwick University thanks to an arrest in 1996 by both God and man (who had taken exception to his chosen trade). He was drawn to Jesus irresistibly while at rock bottom in a small church he is still at in Streatham. He has been involved in many camps, stumblings, and a fair bit of grace! After a year in schools work, he wound up working for the Good Book Company as the third member of the team and is now one of the directors. He also works in an ex-offenders ministry in Brixton (transformed.org.uk). One of his great joys is to represent the crucified carpenter amongst ordinary people, and to build the walls of the Kingdom that will never end.
